

Uniweb's Contract Metal Fabrication Division utilizes our extensive expertise in laser cutting, roll forming, punching, sheet metal fabrication, welding, powder coating, millwork manufacturing, packaging and shipping. From one time prototypes, to small run projects, to jobs of 50,000 parts or more, you will find that Uniweb has the personnel, facilities, equipment and knowledge to design, fabricate, powder coat, custom package and deliver or ship your parts on time, anywhere in the world.

Since 1970, Uniweb, Inc. has built and delivered our line of steel fixtures to the world's largest retailers. In developing our premier products, we have gained a wealth of experience in sheet metal, steel tubing, bar stock and wire fabrication. Combine this manufacturing knowledge with our engineering department's Auto-Cad Mechanical Desktop with Inventor network, and understand why we have an unequalled reputation for quality, craftsmanship, competitiveness and customer service.

Come explore our state-of-the-industry equipment at our 180,000 sq ft facility!
